SWI Group announces launch of SWI Compute at NVIDIA GTC Berlin

Singapore / Amsterdam – October 26, 2026 – Euronext Amsterdam-listed SWI Group ("SWI"; SWICH) today launched its AI Compute vertical, under the name SWI Compute. SWI Compute, a global AI infrastructure company launching first in Europe, emerged from stealth last week at NVIDIA GTC Berlin to build and operate NVIDIA AI factories, backed by 3.6 gigawatts of Power capacity that SWI Group has spent six years securing across Europe and the US.

The new vertical became a Preferred [NVIDIA Cloud Partner](#) in August, ordered approximately \$1 billion of NVIDIA systems and is finalizing contracts with its first customers. SWI Compute will deploy globally, with the strongest presence and deployments in Europe

"Power is the biggest constraint on AI in Europe. SWI Group spent six years securing it, and SWI Compute is putting it to work in NVIDIA AI factories. Within 60 days of becoming an NVIDIA Cloud Partner we had ordered close to ~\$1 billion of NVIDIA systems and we have contracted our first customers. And we're just getting started in Europe and beyond," said Halil Mirakhmedov, CEO, SWI Compute.

Max-Hervé George, Founder & CEO of SWI Group further comments: *"We started investing in land, power and shell in 2020. SWI Compute is the final piece, providing fully integrated infrastructure for NVIDIA AI factories. SWI Group is now a transatlantic, vertically integrated digital infrastructure company, from the grid connection to the GPU, and SWI Compute puts that capacity directly in the hands of the customers who need it most," said Max-Hervé George, Founder and CEO, SWI Group.*

About SWI Compute

SWI Compute is the AI compute platform of SWI Group (Euronext Amsterdam: SWICH), a transatlantic, vertically integrated digital infrastructure and AI compute group with more than €10 billion in assets under management. A Preferred partner in the NVIDIA Cloud Partner (NCP) program, SWI Compute builds and operates NVIDIA AI factories on the group's 3.6 GW power platform across Europe and the US, including AiOnX's five European campuses and SWI Digital's US data centers.
